

Law In Order Introduces Ground-breaking eBundle Solution, Powered by Lexel's GenAI Technology

Next Generation Technology eBundle & Ai Solution

Sydney, Australia – Law In Order, the leading provider of comprehensive document and digital solutions for the legal industry and government, is proud to announce the launch of its latest eBundle solution, utilising Lexel's latest innovation GenAI technology. This revolutionary integration marks a significant advancement in legal technology, offering enhanced efficiency, intelligence, and collaboration for legal professionals across Australia, Asia, and the Middle East.

The new eBundle solution harnesses the power of Lexel's GenAI capabilities to streamline evidence management and digital bundle preparation for eHearings. GenAI brings advanced generative AI functionality that provides deep contextual intelligence on case materials, enabling lawyers and legal teams to process and analyse evidence faster, with greater accuracy and insight.

For nearly a decade, Law In Order has worked closely with LegalCraft, the creators of Lexel, to bring unparalleled technology solutions to legal professionals. This new initiative further solidifies the partnership, as both companies strive to push the boundaries of what legal tech can achieve.

Vamsi Madiraju, Chief Operating Officer at LegalCraft, added, "Australia has always embraced Lexel technology, and it's the perfect market for us to launch GenAI. Law In Order has been an integral partner for us in this journey, and we are thrilled to collaborate with them on this exciting new offering. The integration of GenAI into Law In Order's eBundle solution will empower legal teams with unprecedented capabilities."

Rey Penalosa
Head of eHearings

"The integration of Lexel's GenAI into our eBundle solution is a game changer. We're excited to offer our clients an 'All in One, integrated' tool that not only simplifies the preparation process but also enhances their ability to present cases with precision. This collaboration strengthens our commitment to delivering the most innovative legal technology solutions to the market."

About Law In Order

Law In Order is a leading provider of end-to-end document and digital solutions, specialising in document production, eDiscovery management, and specialist court services. With a strong focus on innovation, the company is dedicated to empowering legal professionals with the tools and expertise they need to excel.

About LegalCraft

LegalCraft is the creator of Lexel, a leading evidence management platform used by legal professionals globally. Lexel's GenAI capabilities enhance legal workflows by providing AI-driven contextual intelligence on case materials, improving efficiency and accuracy in evidence management.

Law In Order Introduces Ground-breaking eBundle Solution, Powered by Lexel's GenAI Technology

Key eBundles Features for eHearing Solutions

Document and Multimedia Management:

Effortlessly upload, view, and share documents and multimedia files in any format.

Inquiries & Searches:

Advanced search capabilities, including boolean searches, OCR cross-referencing, and customisable meta data.

Exhibit Management:

Manage exhibits seamlessly by assigning unique exhibit numbers in real-time, organising them with meta data, and sharing securely.

Jury and Witness Features:

Interactive annotation tools that allow direct engagement with digital exhibits. Enhancing the review process for jurors and witnesses.

Presentation & 'In Court' Display:

Present multimedia files directly from the eBundle platform, facilitating efficient in-court presentations without the need for additional software.

Storage and Archiving:

Securely archive all case materials with detailed documentation, including modifications and annotations.

GenAI:

Automatically extracts key entities, builds accurate event timelines, and generates concise summaries with AI.

Security:

Only authorised individuals can access sensitive materials. Featuring ISO27001, IRAP, SOC 1 & 2, ASD Essential 8, and ISM certifications.
